

CoNHP Simulation Center

Health Sciences Campus
Drexel University
Philadelphia, PA

Conversion of antiquated teaching labs was Phase III of renovations to New College Building for the College of Nursing. Working closely with teaching staff and technology consultants, CDA&I created a 3400sf state-of-the-art simulation center consisting of two adjacent labs with a total of eight headwalls, a technology enhanced control center and video capture system for instructive feedback. Finishes, furnishings and specialty items were selected to create a non-institutional setting that could be altered to create simulations in different types of environments.
